

LOCATION Wintershall Noordzee B.V. in Rijswijk, the Netherlands

Job description

In this role you advise the organisation in complying with legal and industry standards for Health, Safety & Environment. The Environment & Regulatory Affairs Advisor is the focal point for:

- ISO 14001 standard compliance. You support the responsible Task Force on this certification, advise the organisation to maintain and improve the standard requirements and performance and organise and participate in audits;
- Emissions to air and water. You are responsible for registration, administration and reporting, coordinate the emissions measurement and advice on improvements on emission reduction and energy efficiency;
- Environment, Social and Governance (ESG). You provide input on this topic to company's strategy, deliver ESG output and prepare for and maintain reasonable assurance for GHG verification;
- Company ESG & Environment Management. You maintain the environmental aspect, impact and compliance register, monitor and report environmental & energy performance and compliance, prepare and revise OPEPs as required by operational activities on Dutch, UK, German and Danish sectors of the North Sea and participate in investigation on environmental incidents;
- Management of Mining Chemical permits. You support operations by obtaining chemical permits in The Netherlands, UK, Germany and Denmark, maintain and update chemical database and chemical tracking systems, compile annual reports for chemicals to authorities and support data collection for chemical assessment within permit process.

Your team

The successful candidate will join the HSE & Permitting Department in Rijswijk, the Netherlands. This team consists of 8 motivated, experienced and qualified professionals. You will report to the HSE & Permitting Manager.

Requirements

The candidate should have an Engineering or Environmental Management Degree (BSc.). You have 5 – 10 years of work experience, added with a good understanding of environmental regulation. You have sound knowledge and a good understanding on environmental and permitting matters related to (offshore) operational activities. By experience, you have the ability to interact effectively with other departments and external stakeholders. You feel comfortable in the role of a team player and are able to contribute in an active group work setting. Strong communication skills are essential and a good knowledge of both written and verbal Dutch and English.

Our offer

Are you looking for an exciting job opportunity in a fast-paced and dynamic work environment? Wintershall Noordzee is a company that rewards performance and provides excellent growth opportunities. But most of all, you will have the satisfaction of playing a vital role in the careers of your team members and the brilliant success of the organization.
